

Where safety meets comfort!

Durafit is now also available in a fully conductive version.

Under the name Durafit Conductive we offer an highly conductive cover and lining material with the well-known and appreciated properties of classic Durafit.

Electronics are all about precision and technology. The same applies to the Durafit Conductive that we have developed for this industry. Durafit Conductive is extremely efficient at removing even the smallest static charges.

With a resistance of $\leq 0,1 \text{ M}\Omega$, Durafit Conductive amply meets all European safety standards, including the **ESD standard 61340 4-3** and **61340 5-1**. This guarantees a high quality assurance of the end product.

On durafitmicrofibers.com you can download extensive product information. If you have any other questions, Please get in touch!

Conductive

Extremely efficient at removing even the smallest static charges.

Absorbent

High level of moisture-regulating capacity for complete dryness.

Lightweight

Considerably lighter than other materials.

Fast-drying

It offers maximum comfort and complete drying due to its temperature-regulating effect.

High tear resistance

Stable material thickness and highly tear resistant.

Anti-odor

Sweat does not accumulate on the inside of the footwear, Durafit promotes evaporation, so that the foot is always dry.
